

Creating a Password to Log In to Tufman 2 (for R or other scripts)

If you already use **Tufman 2** through the website, you might be signing in with a social account such as **Google**. This works well for the website, but if you want to connect to Tufman 2 from **R** or any other programming language, you'll need to log in using an **email and password** instead.

This is because scripts and tools cannot use the “Sign in with your social account” option.

Do I need to follow these steps?

You **only** need to follow this guide if:

- You only log in to Tufman 2 using a social account (by clicking on the Google button as shown in the screenshot below), **and**

- You now want to access Tufman 2 through R, Python, or another automated tool.

If you already use an email and password to log in, then you are all set, no extra steps required!

If you need to create a password, **please do this based on the email address you are already using to connect to T2** (can be your gmail or the email from your organisation). After your password is created you can choose how to connect to T2, so nothing is going to change, the only thing now is that you will have two ways to connect 😊

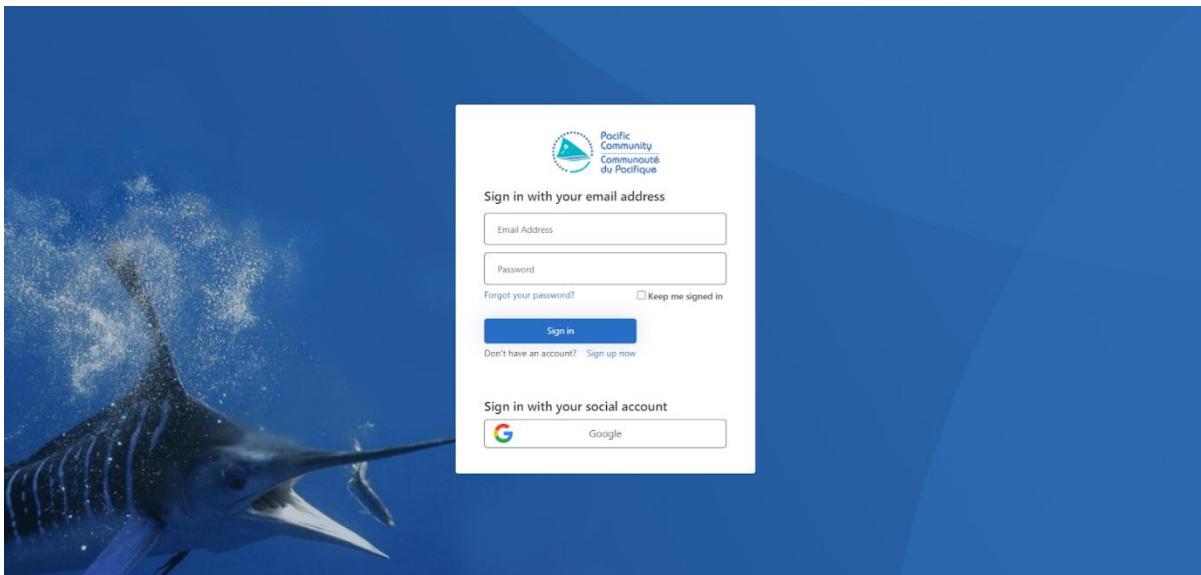

Why is this necessary?

Tools like R cannot press buttons or open social login pages the way people can. They need a simple login method (email + password) to connect securely and automatically.

1. Go to the Tufman 2 website

Open your web browser and enter the **Tufman 2 URL**.

You'll be taken to the **landing page**, where you can choose how to sign in.

This is the login page for Tufman 2. When you reach this page, if it is your first time accessing the new login tool, you'll need to click:

- “**sign up now**” which is just below the *login button* for all other accounts

Sign in with your email address

This information is required.

Send verification code

Create

The verification code email sender will look like this:

Pacific Community B2C account email verification code

Microsoft on behalf of Pacific Community B2C <msonlineserviceteam@microsoftonline.com>

To Bruno Deprez

(i) Click here to download pictures. To help protect your privacy, Outlook prevented automatic download of some pictures in this message.

Inside the email is a 6 digit code that you have to enter like this:

Verify your email address

Thanks for verifying your brunod@spc.int account!

Your code is: 245372

Sincerely,
Pacific Community B2C

This message was sent from an unmonitored email address. Please do not reply to this message.

Once you have got your code, you enter it as shown below and click “**verify code**”

to the input box below.

brunod@spc.int

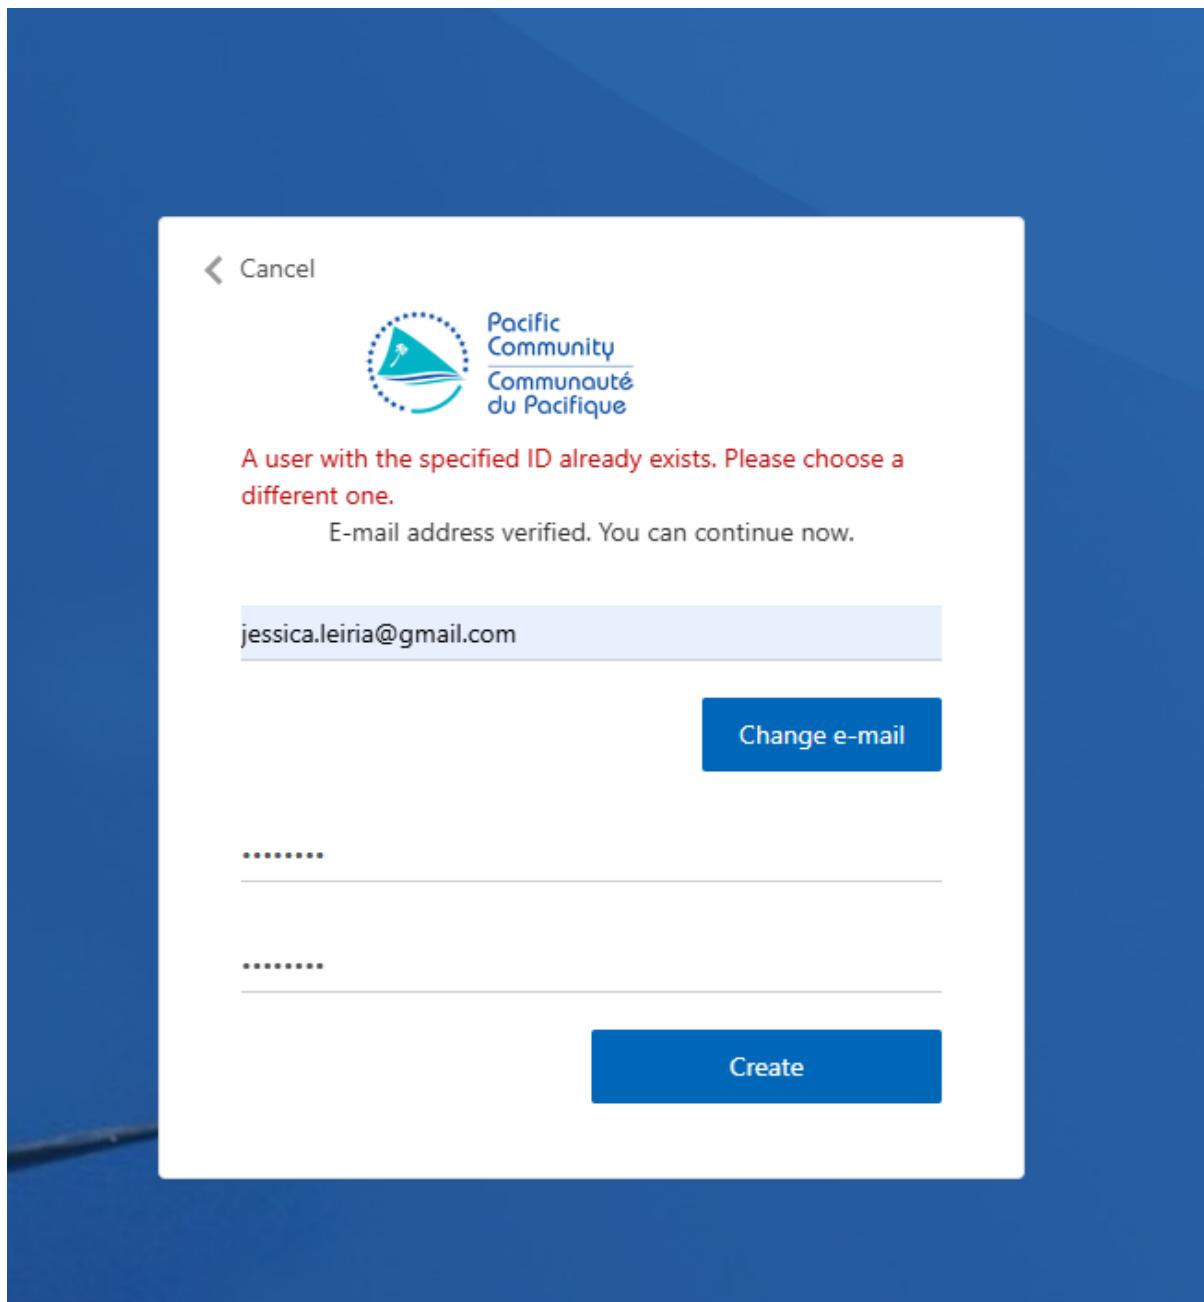

Verification Code

Verify code Send new code

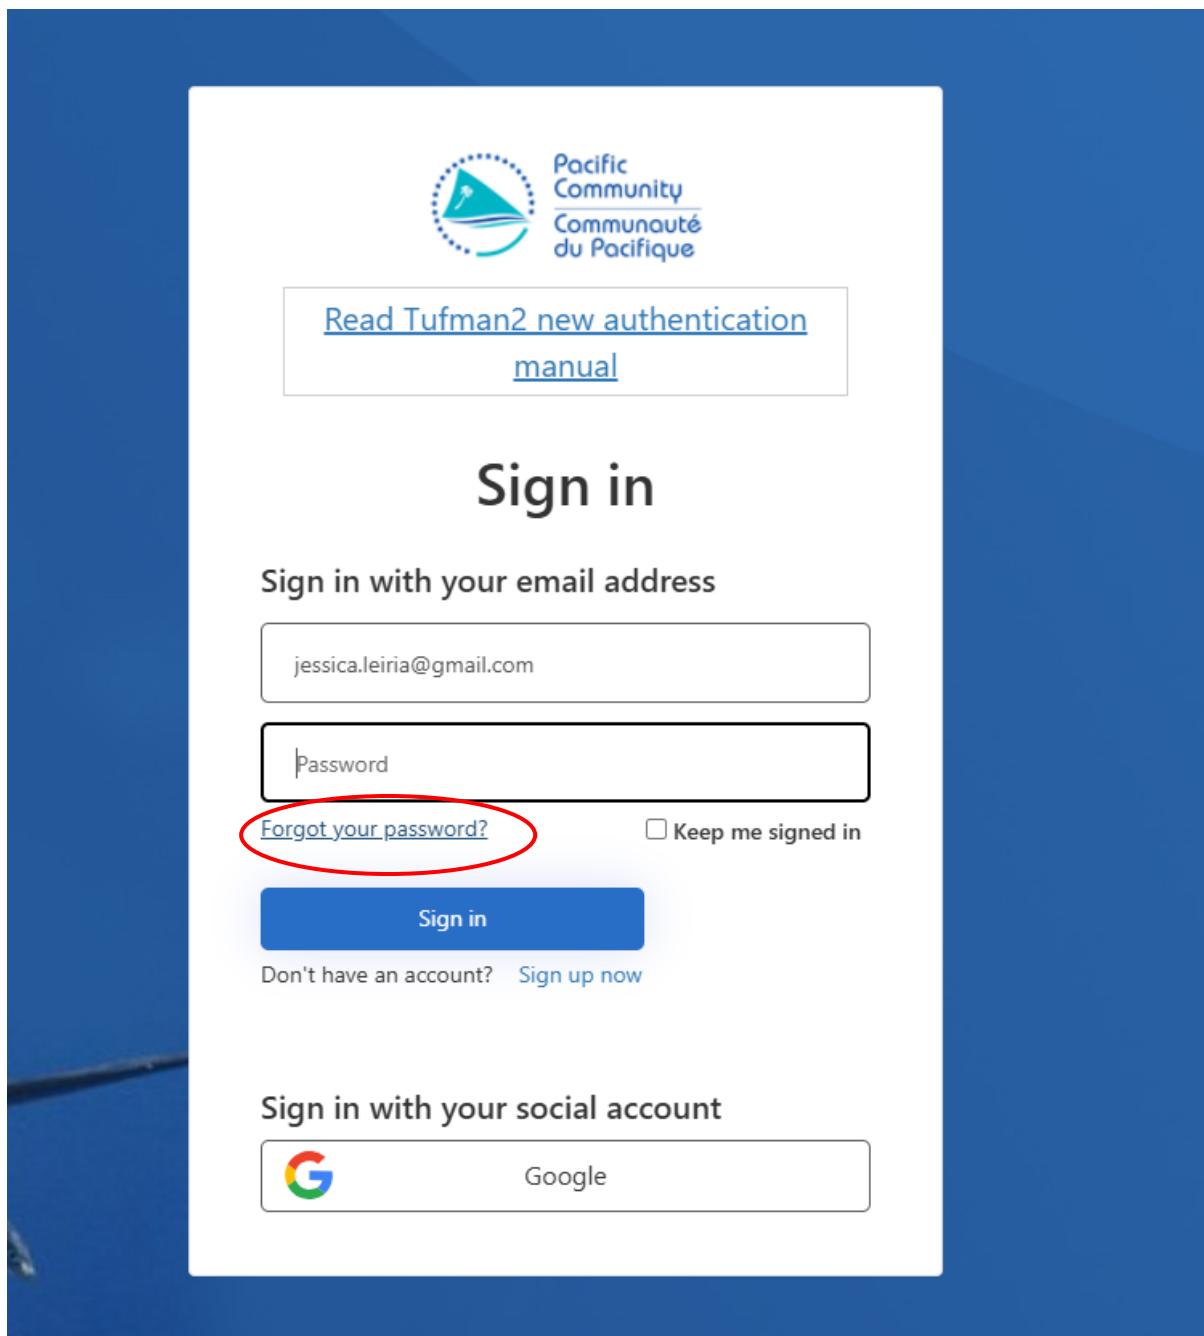

2. Create a password

You can then create your password (please, keep this with you as you will require to use it when requesting the data from T2 reports in your R scripts).

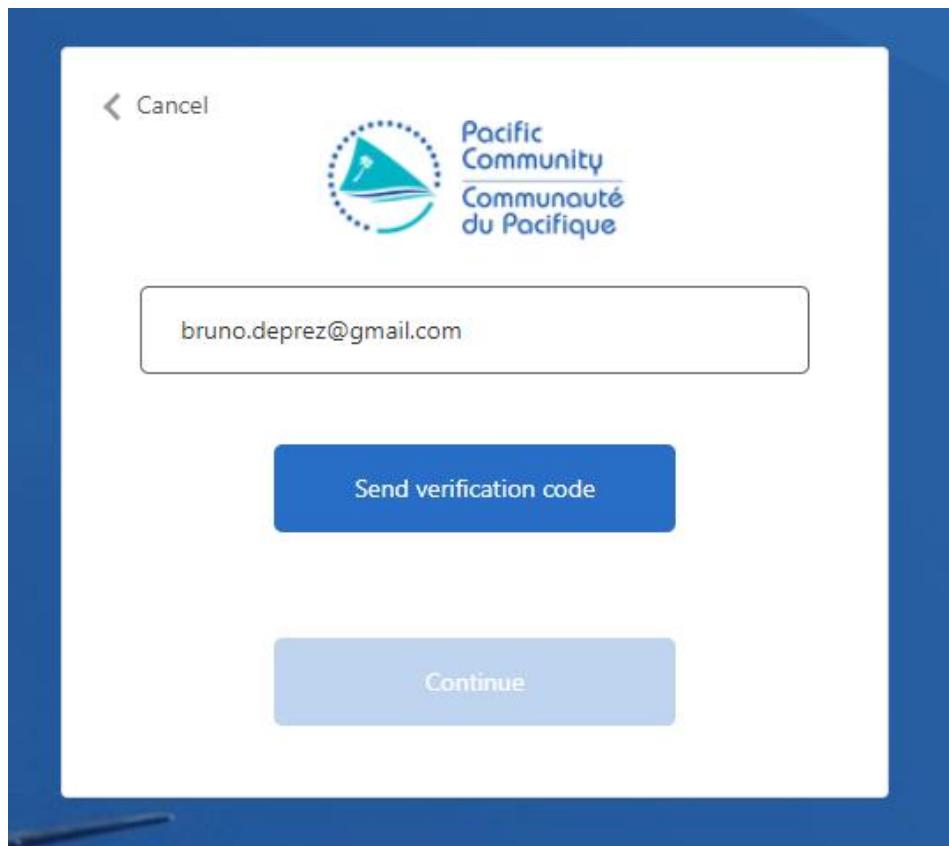

If you get a notification that says the user already exists if means you will need to go back to the initial Tufman 2 login page and click on “**Forgot your password**”.

3. If your user already exists, you just need to reset your password

After you do this, you will need to click the “Send verification code” button to verify your email.

You will receive an email containing your code. The sender looks like this:

Pacific Community B2C account email verification code

Microsoft on behalf of Pacific Community B2C <msonlineservicesteam@microsoftonline.com>

To Bruno Deprez

Click here to download pictures. To help protect your privacy, Outlook prevented automatic download of some pictures in this message.

And the body of the email looks like this with a 6 digit code:

Verify your email address

Thanks for verifying your brunod@spc.int account!

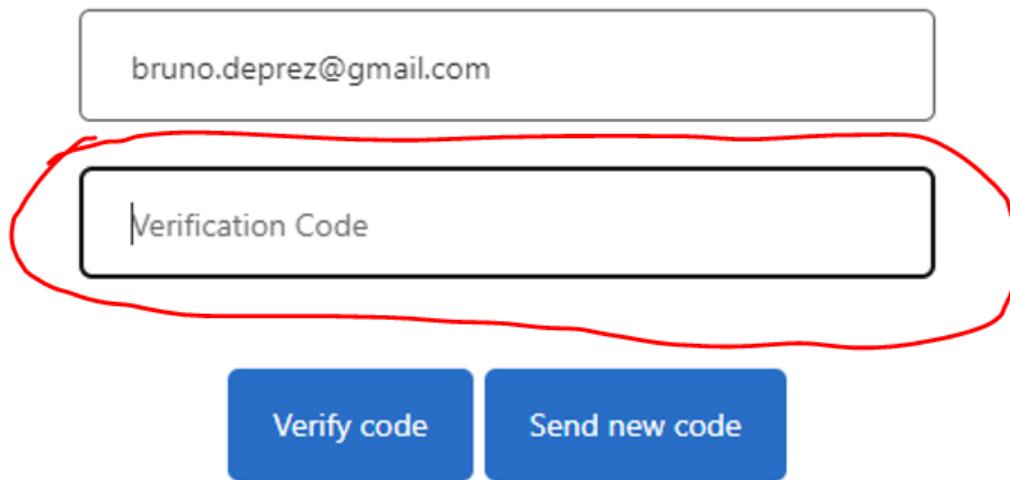

Your code is: 245372

Sincerely,
Pacific Community B2C

This message was sent from an unmonitored email address. Please do not reply to this message.

Once you have the code, copy and paste it in the box shown below, and then click “verify code”:

box below.

bruno.deprez@gmail.com

Verification Code

Verify code Send new code

You can then click the “continue” button to go to Tufman 2.

Follow all the steps that will be prompted, and you are ready to connect to Tufman 2 using a password!
